June 19, 1947.

Dear Dr. Koller:

I have just read your paper "Abnormal mitosis in tumors" in the British Journal of Cancer, I, (1947.) with considerable interest.

You may find the enclosed speculative note of some passing application to the observations you reported.

I should greatly appreciate receiving reprints of this paper, and of those of a similar character, and of the work on the cytological effects of mustards which Dr. Catcheside mentioned during his visit here.

Yours sincerely,

Joshua Lederberg.
